System Description

The CGHCD is a horizontal coiling service door that is designed to close off openings in horizontal and inclined planes. Horizontal coiling service doors can be designed in sizes up to 20 feet in width and 100 feet in length. These units are primarily motor operated systems which are designed and engineered for daily operation. They are available in stainless steel type 304 or type 316 with number 4 finish and in galvanized steel with either a prime paint finish or powder coated finish of color as selected.

System Advantages

CGHCD Horizontal Door is a compact design and offer design professionals the flexibility of using a single horizontal service door in lieu of several roll down vertical acting doors.

Design Alternatives

The CGHCD Horizontal Door is an economical and practical design solution to security problems as well as protection from the elements.

Applications

The CGHCD Horizontal Door is ideal for stairwell covers, escalator covers, floor penetrations, skylights, pit covers, tank covers, machinery covers and overhead craneway access.
