

SOUND BARRIER WALLS & ACOUSTICAL FENCING

CITY-SBWAF sound barrier walls and acoustical fencing are engineered, modular sound panels designed for high sound transmission loss of outdoor noise. Our panels are specifically designed and constructed with environmentally durable composite construction that absorbs sound energy and shields offensive noises.

APPLICATIONS

- Outdoor chillers and HVAC equipment
- Substations and Utilities
- Industrial and Commercial equipment
- Transportation barriers
- Rooftop equipment
- Collectors, Blowers and Compressors
- Any outdoor equipment or noise source
